

Table of contents

1	Introduction	1
1.1	Background	1
1.2	Movement Variability (MV)	3
1.2.1	Modelling Human Movement Variability	4
1.2.2	Movement Variability in Human-Humanoid Interaction	9
1.3	Research questions	13
1.4	Outline of the thesis	14
1.5	Publications	15
2	Quantifying Movement Variability	19
2.1	Introduction	19
2.2	Fundamentals of time-series analysis	19
2.2.1	Linear and nonlinear systems	20
2.2.2	Stationary and nonstationary signals	20
2.2.3	Deterministic and stochastic systems	20
2.2.4	Deterministic chaotic time series	21
2.3	Quantifying Movement Variability with Nonlinear Dynamics	21
2.3.1	Introduction	21
2.3.2	What to measure in MV?	23
2.3.3	Which nonlinear tools are appropriate to measure MV?	24

Table of contents

2.4	Nonlinear analyses with real-world data	27
2.4.1	Nonsationarity	28
2.4.2	Data length	29
2.4.3	Sampling rate	29
2.4.4	Noise	30
3	Nonlinear Analyses	33
3.1	Introduction	33
3.2	State Space Reconstruction Theorem	34
3.3	Uniform Time-Delay Embedding (UTDE)	35
3.4	Estimation of Embedding Parameters	37
3.4.1	False Nearest Neighbours (FNN)	37
3.4.2	Average Mutual Informationi (AMI)	41
3.4.3	Overall minimum embedding parameters	43
3.5	Reconstructed State Space with UTDE	45
3.6	Recurrence Plots (RP)	45
3.6.1	Structures of Recurrence Plots	46
3.7	Recurrence Quantifications Analysis (RQA)	48
3.7.1	Measures of RP based on the recurrence density	49
3.7.2	Measures of RP based on diagonal lines	49
3.7.3	Measures of RP based on vertical lines	51
3.7.4	The weakness and strengths of RP and RQA.	52
4	Experiments	55
4.1	Aims	55
4.2	Participants	55
4.2.1	Human-Image Imitation Activities	56

4.2.2	Human-Humanoid Imitation Activities	56
4.3	Equipment	56
4.4	Ethics	57
4.5	Experiments	57
4.5.1	Human-Image Imitation Activities	57
4.5.2	Human-Humanoid Imitation Activities	60
4.6	Preparation of time series	62
4.6.1	Raw time-series	62
4.6.2	Postprocessing time-series	63
4.6.3	Normalization of time-series	64
4.6.4	Smoothing time-series	64
4.6.5	Window size of time-series	65
5	Quantifying Human-Image Imitation Activities	67
5.1	Introduction	67
5.2	Time series	67
5.3	Minimum Embedding Parameters	68
5.3.1	Minimum dimension embedding values	68
5.3.2	Minimum delay embedding values	70
5.3.3	Average minimum embedding parameters	80
5.4	Reconstructed state spaces with UTDE	80
5.5	Recurrences Plots	81
5.6	Recurrence Quantification Analysis	83
5.6.1	REC values	83
5.6.2	DET values	84
5.6.3	RATIO values	84
5.6.4	ENTR values	85

Table of contents

5.7	The weaknesses and strengths of RQA	85
5.7.1	Sensors and activities	86
5.7.2	Window size	88
5.7.3	Smoothness	88
5.7.4	Participants	89
5.7.5	Final remarks	89
6	Quantifying Human-Humanoid Imitation Activities	115
6.1	Introduction	115
6.2	Time series	116
6.3	Minimum Embedding Parameters	116
6.4	Reconstructed state spaces with UTDE	120
6.5	Recurrences Plots	124
6.6	Recurrence Quantification Analysis	125
6.6.1	REC values	125
6.6.2	DET values	125
6.6.3	RATIO values	126
6.6.4	ENTR values	126
6.7	The weaknesses and strengths of RQA	126
6.7.1	Sensors and activities	127
6.7.2	Window size	128
6.7.3	Smoothness	128
6.7.4	Participants	129
6.7.5	Final remarks	129
7	Conclusions, contributions and future work	145
7.1	Conclusions	145

7.1.1	What are the effects of different parameters for nonlinear analyses with different characteristics of time series?	145
7.1.2	What are the weaknesses and strengths of RQA metrics when quantifying MV?	146
7.1.3	How the smoothing of raw time series affects the nonlinear analyses when quantifying MV?	148
7.2	Contributions	148
7.3	Future work	149
7.3.1	Inertial sensors	149
7.3.2	Nonlinear analyses	149
7.3.3	Variability in perception of velocity	151
7.3.4	A richer dataset of time series	152
Appendix A Examples of Uniform Time-Delay Embedding		153
A.1	20 sample length vector.	153
A.2	Time series from an horizontal movement of a triaxial accelerometer. .	155
Appendix B Equipment		159
B.1	NeMEMsi IMU sensors	159
B.2	Time-series preprocessing	162
B.2.1	Organising Data in Multidimensional Arrays	162
B.2.2	Data Synchronisation	162
B.2.3	Time Alignment	163
B.2.4	Issues with IMUs	163
B.3	Humanoid robot	163
B.3.1	Hardware	163
B.3.2	Software	163
